Re: 113-15891
First Administrative Amendment to
FESOP 113-10260-00047

Dear Bill O'Dell:

Challenge Door Company was issued a FESOP on May 15, 2002 for a door manufacturing operation. A letter requesting an addition to the source was received on April 22, 2002. The change asks for the addition of a dust collector. 326 IAC 2-8-10(a)(11) "allows for changes or modifications involving a pollution control project or pollution prevention project as defined in 326 IAC 2-1.1-1 that do not result in an increase in the potential to emit of any regulated pollutant greater than the thresholds in 326 IAC 2-1.1-3(d)(1) or a significant change in the method or methods to demonstrate or monitor compliance". Pursuant to the provisions of 326 IAC 2-8-10(a)(11), the permit is hereby administratively amended as follows:

The addition of a small internal Torit dust collector. This unit will collect the fiberglass skin residuals from those doors using fiberglass skins instead of wood skins. The estimated increase in emissions related to the collection of fiberglass scraps would be 12 pounds per year. These emissions are less than the exemption levels of emissions. This item will be added to the list of insignificant activities.

(5) One Torit dust collector for collection of fiberglass skin door residuals.

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Donald R. Poole at (800) 451-6027, press 0 and ask for Donald Poole or extension (2-8327), or dial (317) 232-8327.

Sincerely,
